

NEPHROREACH LLC

SOFTWARE DEVELOPMENT SERVICES & INTELLECTUAL PROPERTY ASSIGNMENT AGREEMENT

NephroReach LLC (South Carolina, USA) | Web Wafels (Dhaka, Bangladesh)

Proposed effective date: April 17, 2026 • Each signatory must enter the actual date of signature.

This Software Development Services and Intellectual Property Assignment Agreement (“Agreement”) is made between NephroReach LLC, a South Carolina limited liability company (“Company”), and the development provider identified in the signature block (“Developer”). “Web Wafels” is the provider’s reported business name; its precise registered legal name, registration number, business address, and signatory authority must be completed before execution. The parties agree as follows:

1. Effective date; prior work; relationship to NDA

The parties intend April 17, 2026 as the effective date for the services and project work described here, including qualifying work performed from that date before the actual signature dates, to the extent Developer owns or can validly assign those rights. Neither party represents that this Agreement was signed on April 17, 2026. Developer will identify any prior work, third-party rights, conflicting agreements, or missing contributor assignments in Schedule B before signing. This Agreement supplements the parties’ NephroReach/Web Wafels confidentiality agreement (“NDA”). If the NDA conflicts with this Agreement concerning ownership, assignment, licensing, delivery, or payment for Work Product, this Agreement controls on that subject; the NDA otherwise remains in effect.

2. Services, scope, and deliverables

Developer shall perform only services authorized by Company in a written statement of work ("SOW") signed by both parties. For the work already commissioned through Fiverr, Schedule A may identify and incorporate by reference the applicable Fiverr order, milestone records, project requirements, and written Fiverr communications solely to document the parties' previously agreed scope, pricing, milestones, payment triggers, and delivery commitments. Schedule A must identify the relevant Fiverr order or project sufficiently to avoid ambiguity. This Agreement controls over any inconsistent Fiverr term or communication with respect to Work Product ownership, intellectual-property assignment, confidentiality, repository and administrative control, source-file delivery, security, and handover. Schedule A is the initial SOW and must identify deliverables, milestones, acceptance criteria, deadlines, fees, payment triggers, support obligations, and designated Company accounts. Changes require written approval by authorized representatives. No unstated fee, milestone, or completion date is created by this Agreement.

3. Company materials and confidential framework

Company retains its rights in its pre-existing and independently created materials, including original NephroReach curricula (including the 21-Day Journey), Before the ER, Beyond the Chair, Dialysis Table Talk, original patient logs, dialysis travel and communication workflows, designs, product requirements, business plans, pricing, client information, trademarks, and confidential combinations of methods and information. This clause does not claim exclusive ownership of public medical facts, general ideas, or third-party materials. Developer may use Company materials only to perform authorized services, subject to the NDA; no independent commercialization, portfolio publication, or reuse of Company confidential materials is authorized.

4. Work Product; present assignment

“Work Product” means all project-specific results created, developed, authored, configured, or reduced to practice by Developer or its personnel in performing authorized services for Company, whether complete or in progress, including custom source and object code, scripts, APIs, databases and schemas, UI/UX and Figma files, designs, infrastructure-as-code, configurations, integrations, automations, tests, reports, documentation, specifications, inventions, improvements, and editable/source files, excluding Background Technology and third-party materials properly disclosed under Section 5. To the extent a Work Product item legally qualifies as a work made for hire, the parties so designate it. Otherwise, Developer hereby assigns and transfers to Company, upon creation, all of Developer’s worldwide right, title, and interest in Work Product and all assignable intellectual-property rights in it, including rights in qualifying Work Product created on or after the effective date

before signature to the extent owned or assignable by Developer. Developer will execute further documents reasonably needed to evidence or perfect these rights. Any nonassignable rights are waived or licensed to the fullest extent permitted by applicable law so Company may use, modify, distribute, sublicense, and exploit Work Product without additional approval or fee, subject to express SOW payment terms and applicable law. No assignment is made of third-party rights Developer does not own.

5. Background Technology; third-party and open-source software

“Background Technology” means Developer’s independently developed or previously owned tools, libraries, templates, code, or know-how that are not Work Product. Before incorporation, Developer must identify each material item in Schedule B, including owner, version, license, restrictions, and whether source is supplied. Developer retains title to approved Background Technology but grants Company a perpetual, worldwide, nonexclusive, irrevocable, transferable, sublicensable, royalty-free license to use, reproduce, modify, distribute, host, maintain, and otherwise exploit it as incorporated in or necessary to use, maintain, modify, or commercialize the deliverables. Developer shall not incorporate third-party or open-source components without disclosing their names, versions, applicable licenses, notices, and obligations in Schedule B and obtaining Company’s written approval. No copyleft or other license imposing disclosure or licensing obligations on Company proprietary code may be included without Company’s specific written approval. Developer shall supply required notices and license texts. If Developer cannot grant the foregoing Background Technology license, the parties must agree to different written terms before incorporation.

6. Personnel, subcontractors, and chain of title

Developer shall not permit any employee, freelancer, independent contractor, subcontractor, consultant, agency worker, or other person (each, a "Contributor") to access Company systems, Company Confidential Information, or Project Work except as authorized under this Section. Before any Contributor receives access or contributes, Developer shall identify the Contributor to Company in writing and, for non-employees, obtain Company's prior written approval. Every Contributor must be bound by enforceable written confidentiality, restricted-use, security, and present intellectual-property assignment terms sufficient to vest all applicable project-specific rights in Developer for assignment to Company, or directly in Company, including contributions created before execution of this Agreement. Developer remains responsible for all Contributors and shall maintain a current Contributor roster and reasonable written evidence of the complete chain of title. Upon Company's request, Developer shall provide such evidence with unrelated personal information redacted and shall obtain a direct confirmatory assignment from any Contributor whose ownership chain is incomplete, uncertain, or reasonably disputed. Developer shall promptly disclose any Contributor who cannot grant the required rights and shall not use or continue using that Contributor until the issue is resolved in writing with Company.

7. Delivery, repositories, and operational control

Developer shall continuously commit custom code and maintain deliverables in repositories, design workspaces, cloud environments, deployment projects, and other project accounts owned or controlled by Company, as specified in Schedule A. Any NephroReach repository, fork, mirror, package registry, CI/CD workspace, deployment project, design workspace, or other development asset currently maintained under a Developer or Contributor account shall be transferred or securely migrated to a Company-controlled account within five (5) business days after execution, unless Company agrees otherwise in writing. Company shall have owner-level or equivalent administrative access, including to source code, commit history, branches, tags, issues, build/deployment instructions, configuration, infrastructure-as-code, database schemas, editable design files, documentation, tests, dependency and license inventories, and required credentials through secure transfer. Developer shall identify all related development accounts and shall not withhold Company-owned Work Product, disable systems, introduce lockouts, retain undisclosed access, or maintain unapproved forks or copies as leverage in a dispute. At each agreed milestone and on termination, Developer shall promptly deliver completed and in-progress Work Product and reasonably cooperate in transition, subject to the payment terms expressly agreed in Schedule A. Company may rotate credentials or revoke access at any time. No production credential or secret may be embedded in source code or transmitted insecurely.

8. Fees, acceptance, and payment

Fees, currency, taxes, invoice requirements, payment schedule, and objective acceptance criteria must be stated in a signed SOW. Company shall review submitted deliverables within the review period specified there, identify material nonconformities in writing, and allow the agreed cure/retest process. Payment disputes do not reverse an otherwise effective assignment of Work Product; any unpaid sums remain contractual claims. Neither party may invent additional payment obligations from this

Agreement. Developer is responsible for its own personnel compensation and taxes except as a signed SOW expressly states otherwise.

9. Security, privacy, and patient data

Developer shall follow Company-approved security requirements, least-privilege access, multifactor authentication where available, and prompt incident reporting. No real patient information, protected health information, or regulated health data may be accessed, transferred to Bangladesh, or used in testing solely on the basis of this Agreement. Any such access requires Company's prior written authorization and applicable privacy/security arrangements, including a business associate agreement if legally required. Developer shall not use Company information or code to train external AI systems or upload it to unapproved services without written authorization.

10. Warranties; third-party claims

Developer represents and warrants that: (a) it has authority to enter this Agreement and grant the rights stated here; (b) after reasonable inquiry, all Contributors and third parties whose work is incorporated into Project Work have been accurately disclosed; (c) it has obtained, or before contribution will obtain, sufficient written rights from every Contributor to satisfy Sections 4 and 6; (d) no undisclosed Contributor, employer, agency, platform, or third party owns or claims rights in Project Work; (e) it has disclosed all known third-party restrictions, conflicting obligations, Background Technology, and open-source components; and (f) it will not knowingly insert malicious code, unauthorized access mechanisms, credential harvesting, or hidden administrative access. Developer shall promptly notify Company of any actual or threatened third-party ownership, infringement, contributor, or licensing claim concerning Project Work. Any indemnity, liability cap, insurance, service levels, or additional warranties must be expressly negotiated in a signed SOW or addendum; none is implied here.

11. Termination and transition

Either party may terminate an SOW as stated in that SOW; absent a termination provision, either may terminate future services on 30 days' written notice, without undoing accrued obligations or completed assignments. Developer shall deliver existing Work Product, return or securely delete Company confidential information as required by the NDA, and cooperate reasonably in transfer of Company-controlled systems. Fees for authorized work performed through termination and any agreed transition services are governed by the SOW. Sections concerning IP ownership, licenses, confidentiality, payment accrued, dispute resolution, and other provisions intended to survive shall survive.

12. Governing law; cross-border disputes

South Carolina law governs this Agreement, excluding its conflict-of-laws rules. Subject to applicable jurisdiction and enforcement law, each party consents to the state and federal courts located in Richland County, South Carolina for disputes arising from this Agreement and waives objections to venue to the extent legally permitted. The parties acknowledge that recognition or enforcement of a U.S. judgment in Bangladesh is not guaranteed. Any replacement international arbitration clause must be separately negotiated and signed; this Agreement does not imply that a South Carolina judgment will automatically be enforceable abroad.

13. General provisions

The parties are independent contractors. Neither may assign this Agreement without the other's written consent, except Company may assign it in connection with a merger, sale of substantially all relevant assets, or reorganization, subject to applicable law. Amendments and waivers must be written and signed. Electronic signatures and counterparts are permitted to the extent legally valid. If any provision is unenforceable, the remainder remains effective to the extent possible. Notices shall be sent to the contact emails in the signature block, with confirmation of receipt for termination and breach notices. This Agreement and signed SOWs, together with the NDA on confidentiality, form the entire agreement on their respective subjects; this Agreement controls Work Product ownership in any conflict.

SCHEDULE A — STATEMENT OF WORK

Complete and sign this schedule before relying on it for scope, fees, delivery, or acceptance. For the existing Fiverr engagement, identify the Fiverr order/project and record the previously agreed commercial terms rather than creating new terms unless both parties expressly agree to a change. Attach or reference the relevant Fiverr order, milestone records, or written project specifications if additional detail is needed.

Project / services description:

Specific deliverables (including editable files, code, designs, documentation):

Existing work since April 17, 2026 included (identify versions / dates):

Milestones and delivery dates:

NEPHROREACH LLC

UNIVERSAL NON-DISCLOSURE, PROPRIETARY INFORMATION & INTELLECTUAL PROPERTY PROTECTION AGREEMENT

South Carolina, United States ↔ Dhaka, Bangladesh | Effective date: April 17, 2026; sign using actual dates

Effective Date: April 17, 2026 Receiving Party: Web Wafels (legal entity name and registration to be verified)

Representative: Ismail Hossain, CEO (authority to sign to be confirmed) Role: Web development company

Address: Dhaka, Bangladesh (full business address: _____) Email: mahmud.uiuxdesign@gmail.com

This Agreement is entered into by NephroReach LLC, a South Carolina limited liability company ("Company"), and Web Wafels, subject to confirmation of its exact registered legal name and entity status ("Recipient"), acting through its duly authorized representative Ismail Hossain. The parties intend the Effective Date above to govern their confidentiality obligations concerning covered disclosures on or after April 17, 2026, including disclosures made before the actual signature dates, to the extent lawfully agreed. The actual execution dates must be entered truthfully below. No statement in this Agreement represents that it was signed on April 17, 2026.

1. Limited purpose

Recipient may receive information solely to evaluate, discuss, advise on, or perform services expressly authorized in writing in connection with NephroReach's business, platform, education programs, partnerships, or operations ("Purpose"). This Agreement does not require either party to enter into a transaction or services engagement.

2. Confidential information and proprietary framework

"Confidential Information" means nonpublic information disclosed or made accessible by Company, directly or indirectly, in any form (including oral statements, demonstrations, screenshots, access to systems, documents, or electronic files), whether or not marked confidential, that is identified as confidential or reasonably should be understood to be confidential. It includes the nonpublic selection, arrangement, integration, and implementation of Company's proprietary framework and the following, to the extent owned or lawfully controlled by Company:

- Software, source/object code, repositories, APIs, algorithms, architecture, databases, schemas, integrations, automations, credentials, infrastructure, technical specifications, prototypes, testing results, vulnerabilities and security plans.
- Original user interfaces, dashboards, designs, Figma files, product requirements, patient and caregiver logs, dialysis management, travel coordination, communications, permissions, analytics and operational workflows.
- Original curricula, scripts, videos, training materials and related plans for the 21-Day Journey to Dialysis, Before the ER, Beyond the Chair, Dialysis Table Talk and other programs.
- Business plans, pricing, financial models, launch and expansion plans, prospect and customer information, contract terms, marketing and sales strategies, vendor information, unpublished research and product roadmaps.
- Notes, extracts, summaries and analyses that reveal any of the foregoing.

A combination of information is not excluded merely because its individual elements are publicly known, if the combination itself remains confidential. This Agreement does not assert exclusive rights over general medical facts, publicly known ideas, or materials owned by others.

3. Exclusions

Confidential Information excludes information Recipient can demonstrate through reliable records: (a) became public without Recipient's breach; (b) was lawfully known to Recipient without restriction before disclosure; (c) was lawfully received from a third party entitled to disclose it without a duty of confidence; or (d) was independently developed without use of or reference to Company Confidential Information.

4. Confidentiality and restricted use

Recipient shall (a) use Confidential Information only for the Purpose; (b) protect it with at least reasonable care and no less care than Recipient uses for similarly sensitive information; (c) disclose it only to personnel or professional advisers with a legitimate need to know who are bound by enforceable confidentiality obligations, and remain responsible for personnel compliance; (d) not copy, publish, sell, license, distribute, upload to public repositories, disclose in portfolios or case studies, or use it to develop or improve another product or service except as Company expressly authorizes in writing; and (e) not use

Company's name, logos or marks in publicity without written consent. No provision prevents lawful independent development or use of general skills and experience without Company Confidential Information.

5. Intellectual property; no implied license

Company and its applicable licensors retain their respective rights in pre-existing Confidential Information, original content, software, marks, designs and other intellectual property. Recipient receives only a limited, revocable, nontransferable permission to use Confidential Information for the Purpose; no ownership, commercial license, partnership or endorsement is granted. Recipient shall not remove ownership notices or claim Company materials as Recipient's own.

6. New work and pre-existing materials

Recipient hereby irrevocably assigns to NephroReach LLC all of Recipient's right, title and interest, including applicable copyrights and other assignable intellectual-property rights, in all original software, source and object code, repositories, designs, databases, schemas, APIs, documentation, curriculum, graphics, configurations, inventions and other deliverables specifically created for Company under the parties' development engagement ("Project Work"), whether created before or after the actual signing of this Agreement. For future Project Work, assignment takes effect automatically upon creation to the extent permitted by applicable law. Recipient shall execute reasonable confirmatory instruments and provide records reasonably needed to evidence the chain of title. To the extent any rights cannot legally be assigned, Recipient grants Company an exclusive, worldwide, perpetual, irrevocable, fully paid-up, transferable and sublicensable license to use, reproduce, modify, distribute, host and otherwise exploit that Project Work to the maximum extent legally permitted; any legally required remuneration or formalities must be addressed in writing. Recipient represents that it has obtained, or before any contribution will obtain, sufficient written confidentiality obligations and intellectual-property assignments or licenses from every employee, freelancer, independent contractor, subcontractor, consultant, agency worker, and other contributor who creates, accesses, or contributes to Project Work or Company Confidential Information (collectively, "Contributors"). Recipient shall remain responsible for each Contributor's compliance and, upon Company's request, shall provide reasonable written evidence sufficient to establish the chain of title for all Project Work, subject to lawful redaction of unrelated personal or commercial information. Recipient shall not incorporate third-party or pre-existing materials without Company's prior written approval and an itemized schedule identifying owner, component, license, restrictions and any fees. Ownership of approved third-party or pre-existing materials remains with their respective owners; Recipient grants or procures for Company a perpetual, worldwide, transferable, sublicensable license sufficient to operate, maintain, modify, host and commercialize the Project Work, to the extent Recipient has authority to grant it, and identifies any components for which separate third-party terms govern. Nothing purports to assign third-party rights Recipient does not possess. This section addresses ownership and does not itself alter payment milestones or acceptance criteria under any separately signed services agreement; any inconsistency concerning Project Work ownership must be resolved by an express written amendment identifying the conflicting provision.

7. Security, access and regulated data

Recipient shall use Company-authorized accounts and safeguards, protect credentials and security information, restrict access to approved personnel, and promptly report suspected unauthorized access, loss, use or disclosure to Company at the contact address it designates. Recipient shall not place Confidential Information in public AI tools, external repositories or unapproved third-party services without prior written permission. This NDA does not itself authorize access to protected health information or other regulated personal data; the parties must establish applicable privacy/security safeguards and a business associate agreement when legally required before access.

8. Required and protected disclosures

If legally compelled to disclose Confidential Information, Recipient may disclose only what is legally required and, where legally permitted, shall give Company prompt notice and reasonable assistance seeking protection. Nothing here restricts lawful reports to government agencies, protected whistleblowing, or other rights that cannot lawfully be waived. The trade-secret immunity notice in Section 13 applies.

9. Return, destruction and access termination

Upon Company's written request or end of discussions or engagement, Recipient shall promptly stop use, return or securely destroy Confidential Information and copies in its possession or control, and relinquish Company system access; upon request Recipient shall certify completion. Information required by law or retained in inaccessible routine backups may be

retained only while protected under this Agreement and not otherwise used. Any separately contracted work-product delivery obligations remain enforceable.

10. Duration

This Agreement covers Confidential Information disclosed or accessed on or after April 17, 2026, including before signature, as expressly agreed by the parties upon execution. It continues until either party ends future disclosures by written notice. Duties for non-trade-secret Confidential Information survive five (5) years after the last disclosure; trade-secret obligations continue while the information qualifies as a trade secret under applicable law. The parties do not represent that obligations were previously signed or accepted before actual execution.

11. Remedies; no guarantee

Recipient acknowledges unauthorized disclosure or misuse may cause harm not fully compensable by money. Company may seek available injunctive or equitable relief, subject to applicable law and court requirements, in addition to other lawful remedies. Information is provided “as is” for the Purpose without any promise of completeness or accuracy unless separately agreed in writing.

12. Governing law; international dispute resolution; general terms

The laws of the State of South Carolina, United States, govern this Agreement, without regard to conflicts-of-law principles. The parties consent, to the extent permitted by applicable law, to the exclusive jurisdiction of the state and federal courts located in Richland County, South Carolina, for disputes arising out of this Agreement, and waive objections based on inconvenient forum to the extent legally permitted. Each party shall provide a current physical address and email address for contractual notices; service of legal process must comply with applicable procedural law and any applicable international service requirements. The parties acknowledge that a South Carolina judgment may require separate recognition or enforcement proceedings in Bangladesh and that this clause does not guarantee enforcement abroad. Before filing a claim, the parties shall attempt in good faith to resolve the dispute through written notice and discussions for fifteen (15) calendar days; either party may seek urgent interim relief where legally available. This Agreement is the entire agreement concerning confidentiality for the Purpose, except that a separate signed services and intellectual-property assignment agreement controls work-product ownership if one exists. Amendments must be signed in writing by both parties. If any provision is unenforceable, the remainder remains effective to the extent lawful. Electronic signatures and counterparts are permitted to the extent applicable law allows. For clarity, the Mutual Non-Disclosure Agreement signed August 2, 2026 remains effective to the extent consistent with this Agreement; neither agreement is intended to revoke ownership rights previously vested in Company. In case of an ownership conflict, the provision that more expressly and effectively vests applicable Project Work rights in Company governs, subject to mandatory law and third-party rights.

13. International access, data handling and transfer

Recipient shall not transfer, store, mirror, back up, or permit remote access to Company information outside locations and systems expressly approved in writing by Company. Recipient shall identify all countries from which its personnel or subcontractors will access Company systems, and shall not change access locations without prior written approval. Recipient shall comply with applicable privacy, cybersecurity, export-control and data-transfer requirements. This Agreement does not authorize access to protected health information (PHI) or live patient records; any such access requires Company’s written approval and all legally required safeguards and agreements, including a business associate agreement where applicable. Recipient shall not upload Company Confidential Information, code, credentials or patient information into public generative-AI tools or third-party services without Company’s prior written approval.

14. Personnel, subcontractors and control of systems

Recipient remains responsible for the acts and omissions of all Contributors. Before any Contributor receives access to Company systems, Company Confidential Information, or Project Work, Recipient shall: (a) identify that Contributor to Company in writing, including name, role, employer/contracting entity, and access level; (b) obtain Company's prior written approval where the Contributor is not Recipient's employee; (c) bind the Contributor in writing to confidentiality, restricted-use, security, and intellectual-property obligations at least as protective as this Agreement; and (d) obtain a present assignment or other sufficient written transfer covering all of that Contributor's past, present, and future project-specific contributions so that the rights can vest in Recipient for assignment to Company or directly in Company. Recipient shall maintain those records and provide reasonable written evidence of the chain of title upon request. Recipient shall not appoint,

substitute, or add a Contributor with access to Company information or systems without the approvals required by this Section. Company-controlled repositories, hosting, domains, credentials, cloud accounts, design workspaces, payment accounts, and administrative accounts shall remain under Company control; authorized access does not confer ownership. Recipient shall deliver complete Project Work, source files, editable design files, build/deployment documentation, dependency and license inventories, contributor and access inventories, and reasonably necessary administrative handover information upon Company's written request or as required by any signed services agreement. No obligation requires disclosure of another customer's confidential information or transfer of third-party accounts that cannot lawfully be transferred; Recipient shall instead cooperate in a secure migration to Company-controlled accounts.

14A. GitHub repository transfer and continuity

Within five (5) business days after execution, or another date agreed in writing, Recipient shall cause every repository, fork, mirror, organization, package registry, deployment project, CI/CD workspace, or other development asset containing or controlling NephroReach Project Work that is hosted under any Recipient, Contributor, or third-party account to be transferred or securely migrated, using the applicable platform's supported process where available, into the GitHub organization or other Company-controlled account designated in writing by NephroReach LLC. Company shall have and retain owner-level or equivalent administrative control of all Company-designated repositories and development accounts; Recipient and approved Contributors may retain only Company-authorized, least-privilege access needed for development and may not remove, downgrade, or circumvent Company administrative control. Recipient shall cooperate to preserve commit history, branches, tags, issues and other transferable repository metadata; identify and assist with migrating any nontransferable assets, integrations, CI/CD workflows, webhooks, package registries, deployment keys and connected services; and verify that builds, deployment and access function after transfer. Recipient shall provide and keep current a written inventory of all related repositories, forks, mirrors, branches, package registries, cloud/deployment projects, design workspaces, CI/CD systems, domains, credentials, integrations, and development accounts containing or controlling Company Confidential Information or Project Work, and shall not create or retain unapproved external copies. Secrets, API keys and credentials shall be transferred through a Company-approved secure method and rotated where appropriate, not committed into source control or sent in plaintext. Recipient shall not delete, disable, make private to Company, or otherwise impair the original repository or deployment before Company confirms successful migration in writing; following confirmation, Recipient shall remove unauthorized retained copies and revoke unneeded Contributor access, subject to lawful backup retention under Section 9. The repository transfer conveys operational control and does not substitute for the intellectual-property assignment in Section 6. If GitHub's platform rules prevent direct transfer, Recipient shall promptly notify Company and cooperate in an equivalent migration that preserves the fullest practicable history and administrative control.

14B. Contributor roster and chain-of-title certification

Before execution, Recipient shall provide Company with a complete written roster of all Contributors who have created, modified, reviewed, tested, deployed, or otherwise contributed to Project Work, or who have had access to Company source code or confidential development materials, from April 17, 2026 through the date of signing. The roster shall state each Contributor's name, role, relationship to Recipient, contribution period, and whether a written confidentiality and IP assignment is in place. Recipient shall update the roster before adding any new Contributor. Upon Company's reasonable request, Recipient shall obtain a direct confirmatory assignment from any Contributor whose chain of title is incomplete, uncertain, or reasonably disputed. Recipient certifies that no undisclosed Contributor owns or claims rights in Project Work except as specifically disclosed in writing to Company before execution.

15. International notices and execution

Notices under this Agreement shall be sent to the notice email addresses specified in the signature block, with a copy to any physical address later designated in writing. Each signatory represents that they have authority to bind the party identified. The

parties shall confirm Recipient's exact registered legal name, entity type, registration jurisdiction, full business address, and signatory authority before execution. The Effective Date is April 17, 2026 by agreement of the parties, including coverage of information disclosed since that date; signatures must bear the actual dates of signing and must not be backdated.

16. Notice of trade-secret disclosure immunity (18 U.S.C. § 1833(b))

An individual will not be held criminally or civilly liable under federal or state trade-secret law for disclosing a trade secret (A) in confidence to a federal, state or local government official, directly or indirectly, or to an attorney, solely to report or investigate a suspected violation of law; or (B) in a complaint or other document filed in a lawsuit or other proceeding, if filed under seal.

An individual suing an employer for retaliation for reporting a suspected violation of law may disclose the trade secret to the individual's attorney and use it in court if any document containing it is filed under seal and it is not disclosed except by court order.
